

Keep Your Play Area Safety Surface in Ship-Shape...

...by pouring your SofSURFACE in place!

When the play area to which you wish to add protective safety surfacing to, has a unique shape, contour or thickness, SofCRETE® becomes the solution. SofCRETE® pours in place effortlessly, conforming around posts and squeezing into tight corners to create a beautiful, seamless, one-piece protective surface. It is ideally suited for safety surfaces under and around creative play centres or resilient surfaces such as walkways, patios and pool decks. SofCRETE® keeps these areas clean and dry, free from weeds and buried debris, at the same time it offers users protection from falls.

In addition to the safety features, SofCRETE® offers the advantage of customizing the design of your surface, allowing designs of virtually any shape and/or color to be embedded into your SofSURFACE. There is no limit to the creativity we can offer or you can suggest.

Our expert design and engineering services are available to assure you of a surface that not only meets all applicable safety regulations, but also meets with your satisfaction. You have our guarantee that all aspects of the job are met from start to finish and your customized SofSURFACE will last for years to come.
