LANDSOFT™ SYNTHETIC TURF

COMMERCIAL

Little Tikes Commercial's new Landsoft Synthetic Turf blends substance with style to offer the world's most natural-looking protective playground surfacing! When safety and class matter, step onto the future!

- Landsoft Synthetic Turf offers an appealing "natural grass" look and feel unique to this product. No other approved playground surfacing even comes close to its enticing appearance and texture.
- It's **resilient** enough to meet ASTM F1292 criteria for **5' to 10' fall heights** and fully complies with ADA to be **wheelchair friendly**.
- Synthetic turf stands the test of time through **years of uncompromising performance** in heavy use with only slight upkeep required.
- 100% non-toxic, non-staining, flame resistant turf is **safe for kids and pets** and doesn't attract insects, retain moisture, or splinter.
- It's **affordable** for playgrounds of all shapes and sizes in any setting. Five star quality ultimately assures a **better value** over cost competitors.
- Synthetic turf **won't wash or blow away**.
- Patented design, expert construction and superior materials produce the **strongest, safest, most attractive** and **most durable** turf on the market.
- Little Tikes Commercial provides **the best warranty** in the business on both labor and materials.
- **Rapid-flow drainage system** allows turf to be played on right after heavy rains with no mud or grass stains.

Revolutionary design, state-of-the-art manufacturing, first-rate materials, and extensive safety testing yield an attractive product of premium quality and proven durability!

- Fibers are 100% polyethylene with fade-resistant UV stabilizers, urethane coating (lasts 3 times longer than latex), and no heavy metals!
- A thick, soft, realistic feel is achieved with 40% more fiber per square yard than our competition.
- 100% all rubber infill eliminates hygiene and contamination problems typical of sand infill.
- Unique primary backing system is heavier than our competition and offers greater dimensional stability and ultimate protection from pollutants.

LANDSOFT™ RUBBER CRUMB

COMMERCIAL®

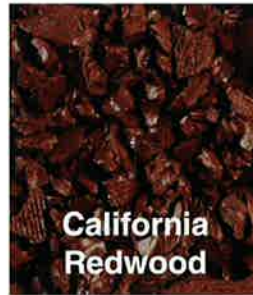

Natural American

Grass Green

Boston Brown

California Redwood

Black Pearl

Caribbean Blue

Little Tikes Commercial's new Landsoft™ Rubber Crumb is the optimum playground safety surfacing with the best features of both rubber tile and wood fiber but none of the drawbacks!

- **More affordable than rubber tile** and other unitary surfacing types
- **Safe for kids and pets** – non-toxic, non-staining, and flame resistant, and doesn't attract insects or splinter like some wood fiber products
- **Softer than sand** – exceeds ASTM F1292 while being **more durable than wood fiber**
- **Low maintenance** – drains better than wood fiber and doesn't wash or blow away
- **Easier and less expensive to install** than tile
- **Long-lasting, vibrant colors** retain look year after year thru all seasons and heavy usage
- **Helps disperse the energy from falls** – Loose-fill rubber crumb displaces and spreads out the energy upon fall impact.
- **Wheelchair friendly** – stable enough to meet ASTM F1951 unlike some competitors
- **Good for the environment** – 100% recycled natural & synthetic rubber keeps millions of scrap tires from landfills and conserves forest resources.

Our unique, state-of-the-art manufacturing process makes a safer & better quality product!

- **An extra measure of safety** – Our unique cryogenic freezing process removes **100%** of the metal wire from recycled tires, unmatched by competitors. This process also provides a clean, smooth particle that looks and feels better.
- Landsoft's particles are smaller than our nearest competitor's for a **more stable playground surface** and **improved impact attenuation**.
- Special coating mixture of polyurethane, elastomer and synthetic latex **resists fading** and leaching.

LANDSOFT™

www.littletikescommercial.com 1.800.325.8828

Children Deserve To Play Safely

The most important part of a playground is what lies beneath. A dependable, consistent surfacing system is the best means to a child's protection.

Approximately 60 percent of all playground injuries are due to falls, so it is important to provide children with a safe surface below.

LandSoft™ is a unique playground surfacing system designed for safety as well as beautification in and around play environments.

LandSoft™ provides superior shock absorption and impact protection from falls-the most common source of serious injuries related to playground activity.

LandSoft™ Turf

SofFill™ infill

SofPad™ Pro

Compacted Soil

Why LandSoft™ Synthetic Turf

www.littletikescommercial.com 1.800.325.8828

- Provides a safe, sanitary play area for children underneath and around playground equipment. LandSoft™ Synthetic Turf systems are much more sanitary than sand, pea gravel, wood mulch, and rubber products.
- 100% Anti-microbial. SofPad™ Pro, SofPad™ Standard, SofFill™ Infill and LandSoft™ Turf are all anti-microbial and not subject to bacterial buildup.
- Eliminates buried debris that could be harmful.
- Significantly reduces potential for eye injuries as a result of children throwing pea gravel, sand, wood mulch or crumb rubber infill.
- Easy to install. Comes in 4' X 4' interlocking panels that easily lay into place.
- Durable. Can be driven on, frozen, cut, exposed to water, chemicals, etc. without losing its strength.
- Significantly reduces insects. Reduces bites from chiggers and other insects.
- LandSoft™ Synthetic Turf will not stain clothing - keeping children clean.
- Consistent Gmax and HIC safety ratings. Systems available to meet ASTM F1292 requirements for up to 12ft critical fall height.
- Completely ADA Accessible.
- Significantly reduces maintenance costs. No top-off, raking or repositioning of mulch is required.
- Fast Drainage. Provides rapid water drainage both vertically and laterally, even on a .5% slope.

LandSoft™ vs. Crumb Rubber Infill Systems

- | | |
|--|--|
| <ul style="list-style-type: none"> ▶ LandSoft™ system is 100% anti-microbial and will not absorb moisture ▶ LandSoft™ turf can be cleaned with power washing, leaf blower and/or vacuum equipment ▶ Cooler surface temperature due to infill system not exposed to sunlight ▶ Quartz silica sand infill is buried deep in turf's thatch layer making displacement very difficult ▶ Non-flammable infill system ▶ Engineered pad provides a consistent HIC rating regardless of ambient temperature ▶ LandSoft™ infill system cannot be displaced by children using the playground | <ul style="list-style-type: none"> ▶ Infill can retain moisture, which can lead to the growth of bacteria and fungus ▶ Crumb rubber will be blown or washed away if playground surface needs to be cleaned using power washer, vacuum or leaf blower ▶ Black crumb rubber infill systems absorb and retain heat ▶ Crumb rubber is easy for children to pick up and throw ▶ Rubber infill subject to fire from cigarettes or vandals ▶ Inconsistent and unpredictable HIC and Gmax safety ratings due to degradation, temperature and moisture content ▶ Rubber crumb can be displaced/thrown by children, leading to possible eye irritation and infections |

LandSoft™ Turf

LandSoft™ Turf is a unique blend of polyethylene monofilament fibers and nylon thatch layers. The combination of these fibers provides a very soft, plush carpet-like feel. The nylon thatch layer gives the turf the bounce and resiliency characteristics needed in a playground surface while also encapsulating the sand infill used to hold the system firmly in place. The variations of green nylon and polyethylene fibers give the turf a very natural grass-like appearance. LandSoft™ Turf simulates a fine blade fescue or blue grass, creating beauty that never needs fertilizing, watering or mowing.

SofPlay™ Infill

Our proprietary acrylic-coated round quartz sand that is 100% anti-microbial.

SofPad™ Pro

SofPad™ Pro is a patented high-performance drainage and impact cushioning playground surfacing system. It combines all the benefits of fast drainage with a unique "impact profile" that provides superior safety properties not attainable in many of today's traditional playground surface materials.
