

Mega Soaker (C02-070) *Patent Pending

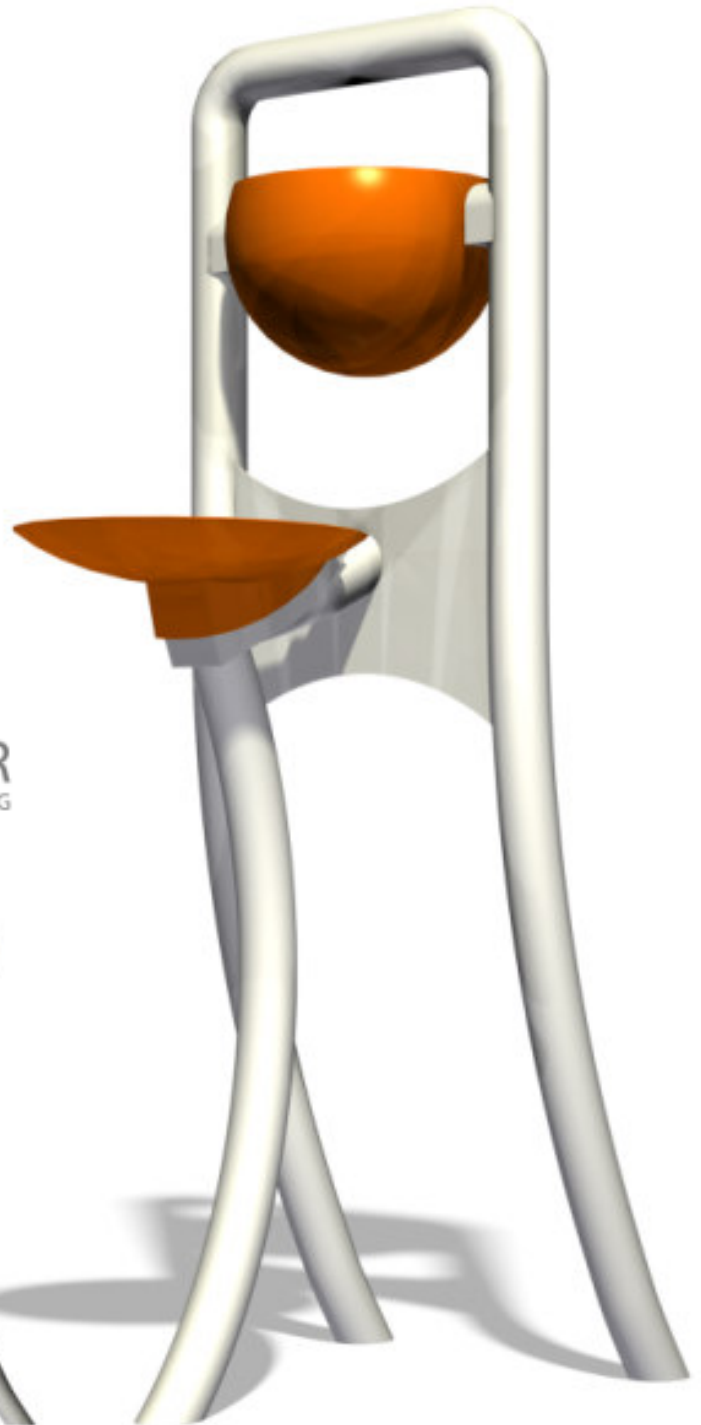

Mega Soaker Dumping Bucket:

Form meets function and massive play value the new Mega Soaker. This architecturally appealing tri-pod reaches nearly eighteen feet high, and dumps up to 90 gallons of water every 90 seconds on those daring enough to stand below. In addition to the aesthetic appeal of the tri-pod design, this also increases the ease of installation and reducing installation costs. The deflector plate is easily adjustable based on water effect preferences, while further customizations include graphics on the bucket and panel add-ons (at an additional charge).

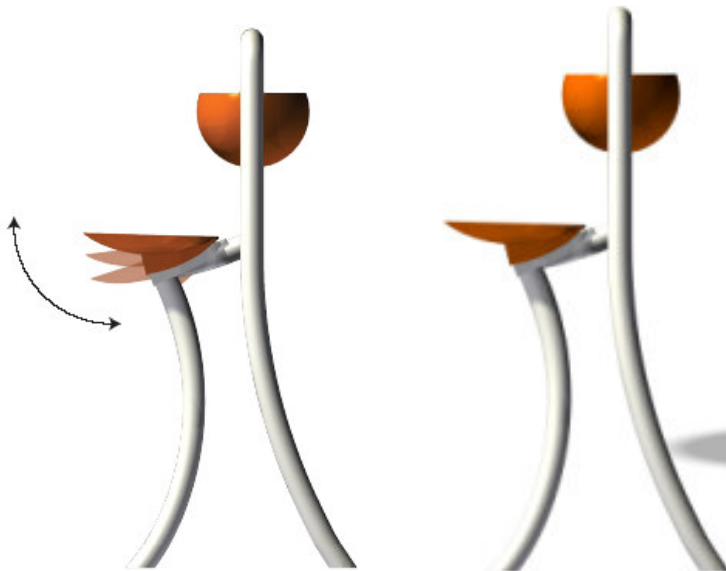

Mega Soaker (C02-070) *Patent Pending

... More about the

- ◆ 18' /5356 mm height
